

# AccountTek. Why should I consider it?

AccountTek is a fully featured general ledger based accounting system tailored for a booking agency.

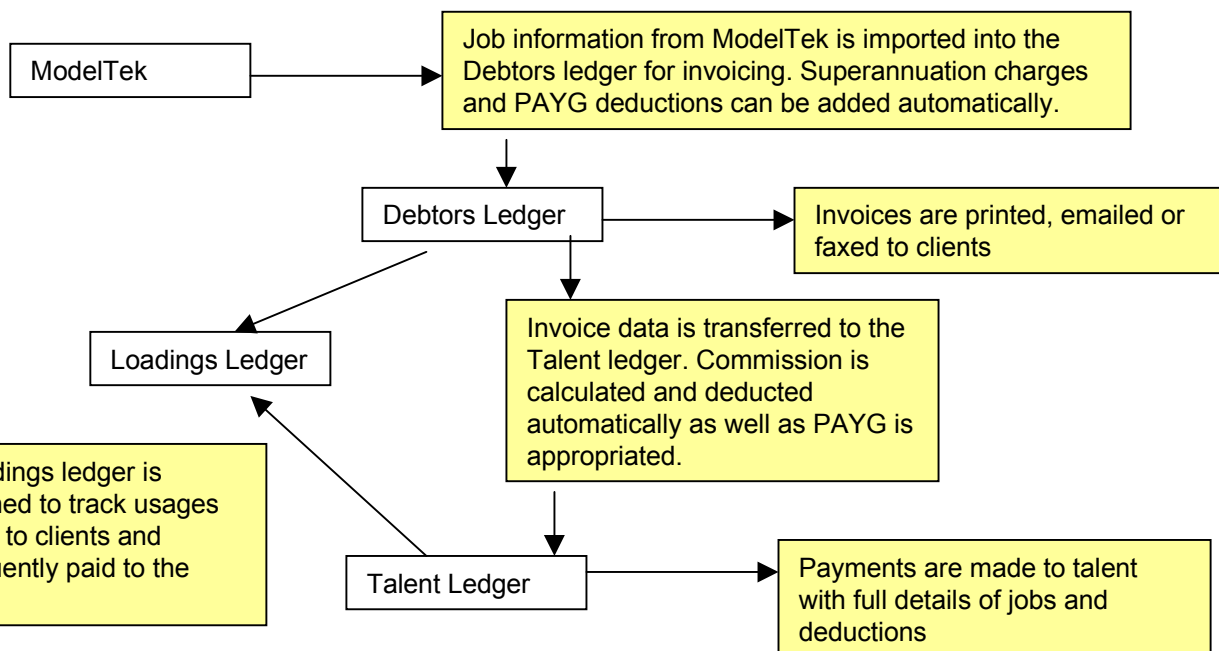

It performs the regular functions of an accounting system but also allows you to administer a separate ledger for talent payments.

Furthermore, information can be imported from ModelTek (or manually entered) into the debtors ledger to invoice the clients. These jobs then flow automatically to the talent ledger for payment.

And more...

This document is designed to introduce you to AccountTek and show how it can become an integral tool for your agency. Hopefully it will convey enough information for you to decide if further enquiry is warranted. For further details please contact ADE Group.

Debtors ledger shows all transactions unpaid at a glance. The unique Chase feature also allows you to keep track of overdue invoices and record all dealings with clients. You can also fax or email a copy of the invoice straight to the contact you are dealing with.

A range of reports from ledger listings to sales analysis reports is available.

A separate Talent ledger is maintained to manage payments to the talent. This allows specialised reports such as the talent tax report to be generated, providing a periodic tax summary of all the transaction processed through their ledger.

This is invaluable for accountants who have to consolidate the talents PAYG from clients and the agency as well as GST charged.

A range of reports from ledger listings to sales analysis reports is available.

You can assign a job to any transaction and keep track of the profit or loss on each job. The loadings ledger marries up usages invoiced to clients on behalf of talent and the payments made to them. This allows you to delay paying the talent until you have received the funds from the client.

The job cost grid allows you to drill down to the transaction level of each job. You can also print a detailed job summary report.
